LIST OF THE WORLD

GREENLAND WILLY INDIES

JOHN GRANT WILLY

GREENLAND WILLY INDIES

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED

P R E F A C E .

THE Birds of Grenada being so little known, the writer has been induced to prepare the following list, which he trusts may prove of use to those interested in bird-life, and in the island generally.

There appears to have been little notice taken of our birds until the year 1878, when the Smithsonian Institution of America sent out Mr. F. A. OBER, who made a tour of the West Indies, collecting birds and "taking notes" generally; the result of which was the production of that entertaining volume "Camps in the Caribbees." Mr. Ober made but a short stay in Grenada, and his list of birds amounted to fifty-four: the writer has since added thirty-nine more, and had the pleasure, during the past year, of discovering two birds new to science, (*Engyptila wellsi*, and *Zenaida rubripes*), and also one new to the Antilles, (*Cymindis uncinatus*.)

Most of the birds obtained by the writer were sent to the Smithsonian Institution, and determined by G. N. LAWRENCE, Esquire, of New York, the well known Ornithologist and authority on birds.

JOHN GRANT WELLS.

GRENADA,
MARCH 1886.

PREFACE.

When this volume was first published in 1832, it was the only book of its kind in the English language. It has since that time been translated into French, German, Italian, Spanish, and Portuguese. The present edition is a new and enlarged one, and is the result of a long and laborious study of the subject. It is intended to be a complete and accurate treatise on the subject, and is the work of a long and laborious study of the subject.
